

i WHAT

The proposed project consists of the redesign and expansion of an existing 20-year old, 50-seat amphitheater adjacent to the park’s Nature Center. This is needed because seating capability is limited and does not serve average attendance which often exceeds three times the amphitheater’s capacity.

The proposed project increases seating capacity to 120, with access and designated seating in compliance with ADA standards. Pathway lighting will be installed along the tiered seating area, and the site will be regraded to create terraced seating that is adequately sized for all guests. The project also includes native landscape planting to enhance the park’s natural setting, and additional canopy trees will be planted on the periphery of the seating area to provide shade.

Existing Amphitheater and Surrounding Area

Proposed Amphitheater and Surrounding Area

📅 WHEN

Anticipated Construction Duration:

March 2022 through May 2022

Working Days/Hours:

Monday – Friday, 7:00am to 4:00pm

The construction schedule is tentative and subject to change due to weather and other factors.
