

# REGIONAL FORCE MAIN REPLACEMENT PROJECT - PHASE ONE

## KEY INFORMATION

**Start:** Summer 2024  
**Estimated Completion:** Winter 2026  
**Location:** Laguna Niguel Regional Park

**Construction Time:** Mon - Fri | 7am - 4pm

*\*No work will be performed during holidays or during inclement weather.*

## PHASE ONE INFORMATION

- **Start:** June 2024
- **Estimated Completion:** December 2024
- **Trail Closure:** Trail along the east side of Laguna Niguel Lake

View the map on the back to see the exact location of trail closure during Phase One.

Phase Two information to come.

## PROJECT OVERVIEW

Moulton Niguel Water District will replace nearly two miles of sewer pipeline within Laguna Niguel Regional Park. The existing pipelines carry wastewater from Moulton Niguel's pump station to the Regional Wastewater Treatment Plant.

A \$10.3 million grant will fund up to 75% of the project. This grant is administered by the California Office of Emergency Services and funded by the Federal Emergency Management Agency's Hazard Mitigation Grant Program.

The new pipelines will help to ensure continued safe and reliable service for our community.

**Thank you for your support as we work to improve critical wastewater infrastructure!**

## BENEFITS

**Enhanced Capacity:** The new force mains will convey over half of all the wastewater generated in MNWD's service area, ensuring efficient wastewater management.

**Infrastructure Strengthening:** This project aims to bolster Orange County's critical wastewater infrastructure, making it more robust and reliable.

**Increased Resilience:** By mitigating the risk of damage during seismic events and severe storms, the project enhances the safety and durability of our wastewater system.
